

TTX PROCESS MIXERS

Taking the
Waste out of
Wastewater

TTX Process Mixers boast a no-nonsense design that ensures reliable operation.

Because they have no gearbox, mixers run quietly and have a very long life expectancy. The only parts that wear are the belts, which may easily be replaced with a trip to an auto parts store. Mixers can be custom built to match any size vessel. The heavy duty construction and top-quality components of these **TTX Environmental** products offer years of worry free use.
